Reference ★ Latest weekly statistics in Chiba Prefecture

| | | ★ Prefectural Data |
|-----|--|-----------------------|
| (1) | Classification of infection level (※) As of Apr. 5 | Level 2 |
| (2) | Rate of occupancy of hospital beds reserved for patients in Chiba Prefecture (with comparison to the previous week) As of Apr. 5 | 26.2% (-3.5 points) |
| (3) | Rate of occupancy of hospital beds reserved for serious patients in Chiba Prefecture (with comparison to the previous week) As of Apr. 5 | 13.3% (+1.6 points) |

※ This is the degree of the infection severity and shortage of medical care capacity in Chiba Prefecture as evaluated by the criteria set by the prefecture.

Level 2: The condition in which the number of new infections is trending upwards and there is an increasing load on medical care for COVID-19 infections and for general medical care, however, adequate medical treatment to those in need is made possible by continually increasing the number of available hospital beds. (Chiba Prefecture website)

Please refer to the Chiba Prefecture website for information on the above items, medical infrastructure in the prefecture, and criteria for infection evaluation.

Requests from the Municipal Government to the Residents (Apr. 7)

The number of new cases and hospitalized patients are on the rise. There are more opportunities for people to travel and dine out with friends as we entered the new fiscal year. Thus, there are concerns about the rebound of infections. Please continue to relentlessly implement infection prevention measures thoroughly.

☑ Please continue to follow basic infection prevention measures while avoiding “the three C’s”.

☑ Please refrain from going to places where infection risk is high such as crowded places.

☑ If you are elderly or have chronic diseases, please make efforts to reduce risks for infection, such as only meet in person with a few familiar people.

☑ When you dine out, please enjoy a meal with the number of people that can ensure social distancing, with up to four per table in principle. Also, please continue to take note of the following:

※Please use restaurants with Certified, or Confirmed status.

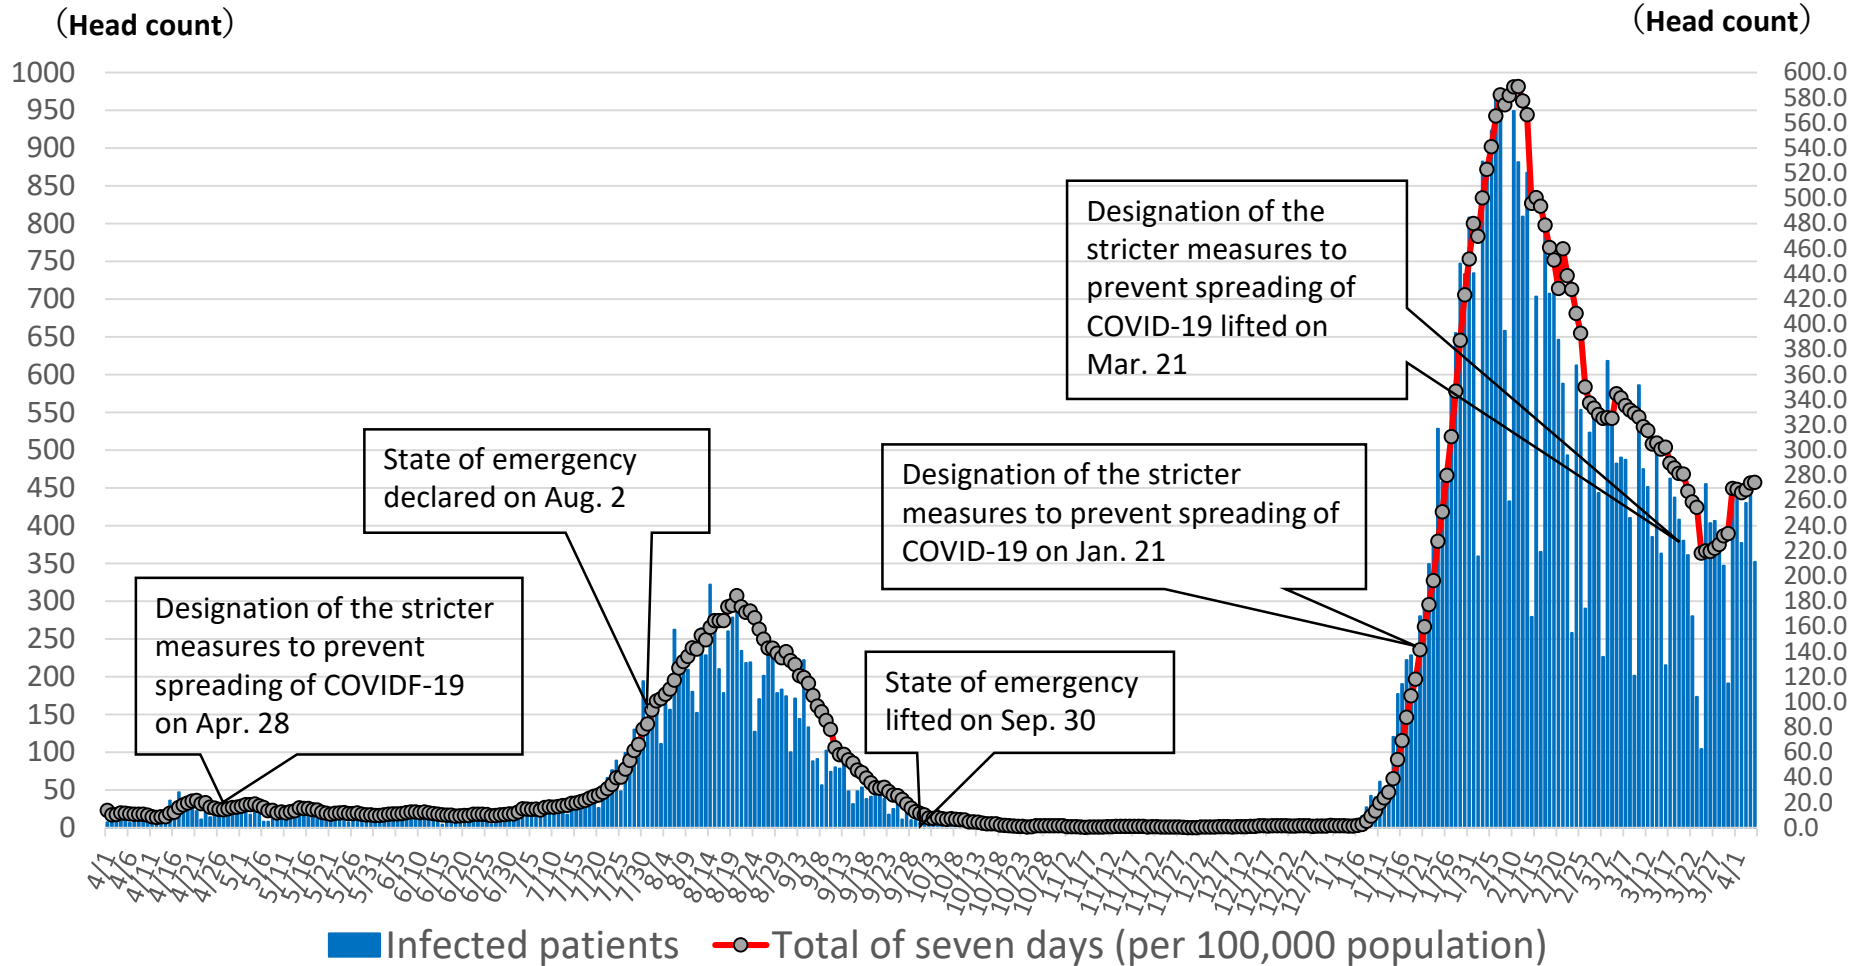

☑ If you feel even just a little unwell, e.g. fever or tiredness, please refrain from going out and visit a medical institution after consulting by phone in advance.

(Chiba City Home page)

Changes in the official tallies of infected patients in Chiba City, in terms of the actual daily number of infected patients, and the adjusted seven-day total of those per 100,000 population

As of Apr. 5

※ The number of infected patients is calculated by subtracting the number of patients who live outside Chiba City from the number announced by the Chiba Municipal Government.

Current Status of Newly Infected Patients in the City (Date of confirmation)

As of Apr. 3

※The figures shown above are based only the head count already announced, are subject to change later.

Number of People Tested by Private / Public Institutions & Positive Rate of COVID-19

As of Apr. 3

※The results by private institutions are preliminary due to the reporting time lag, are subject to change later.

The Breakdown of Newly Infected Patients by Age

During the past two weeks, the number of infections among the people aged 10 to 19 is noticeable.

The last two weeks (Mar. 21–Apr. 3, 2022)

Reference : Total period (Jan. 31, 2020–Apr. 3, 2022)
