

Information about COVID-19 Vaccination (Aug. 25)

New cases of infections are increasing in the city! Please consider getting vaccination as soon as possible!

1. Please consider the 4th vaccination!!

Expected effects by the 4th vaccination

☆ Preventive effect for severe disease

- Elderly people
- Persons with underlying conditions

Those at high risk of serious illness

<Eligible persons for the 4th vaccination>

- 60 years of age or older
- 18-59 years old who meet one of the following conditions
 - Those who have underlying conditions (i.e. high blood pressure)
 - Obese person with a BMI (weight in kg/square of height in meter) of 30 or more.
 - Those who are considered by the physician to be at high risk of serious illness
 - Work staffs at medical institutions or care facilities for the elderly or the challenged person

One more week left before August is over. If you have not been vaccinated yet, please consider to do so during the summer vacation.

2. Please get vaccinated during summer holidays ! Reservation slots for mass vaccination are coming to fully-booked !

3rd vaccination is expected to be effective in preventing the onset of the Omicron variant.

- More than 5 months passed after 2nd vaccination → Effective 35%
- 2 weeks to 3 months passed after 3rd vaccination → 65%
- More than 3 months passed after 3rd vaccination → 54%

※Extracted from the 4th tentative report on the case-control study of the effectiveness of the COVID-19 vaccines, Aug. 17, 2022, NIID

You can easily get vaccinated at Mass Vaccination Venues.

- Reservation is open for "group vaccination" to be able to get vaccinated together with your friends and colleagues at work.
- Open until "21:00 on weekdays" and also open on "Saturdays, Sundays and holidays"
- "Vaccination without prior reservation" is also available.
- If you are concerned about side effects, you can also get "Novavax" vaccine which is said to have relatively less side effects.

Reservation status as of Aug 24 is shown below.
